-- " A current-in-plane magnetic sensor comprising: a sensor stack including first and second layers of ferromagnetic material, a first nano-oxide layer positioned adjacent to the first layer of ferromagnetic material, and a layer of non-magnetic material positioned between the first and second layers of ferromagnetic material, wherein the thickness of the non-magnetic layer is selected to provide antiferromagnetic coupling between the first and second ferromagnetic layers; a magnetic field source for biasing the directions of magnetization of the

first and second layers of ferromagnetic material in directions approximately 90.degree.with respect to each other; “--

And all other limitations as recited in claim 1.
